The world of Oracle is ever changing. Today's users, developers and project managers need help identifying ways to maximize the effective and efficient use of Oracle Applications. The Oracle Applications Users Group (OAUG) is the source for navigating the global resources developed by over 100,000 real users and partners worldwide.

The OAUG offers users the opportunity to:

- Connect with Oracle by participating on pricing, quality, support, usability, best practices and Fusion councils and boards to provide direct input into Oracle's product strategies.
- Develop contacts and network with other users around the world through educational conferences and geographic and special interest group events.
- Gain access to a repository of white papers, articles and proprietary research that offers real users real solutions.
- Collaborate online with other Oracle users through communication tools and channels.

Today's business leaders, including General Electric, Dell, Yale University, the City of Las Vegas, the Dallas Independent School District, NASA, Best Buy and the Gap, are OAUG members. The OAUG helps these organizations expand their knowledgebase, strengthen professional capabilities and navigate the global resources needed to enhance the value of their Oracle Applications investment.

**Join today and learn how
the OAUG can assist your organization.**
